DT01 Rec'd PCT/PTO 11 FEB 2005

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Original) A process for producing higher molecular weight hydrocarbon compounds or oxygenates from a gas comprising methane, said process comprising:

generating synthesis gas ("syngas") comprising carbon monoxide and hydrogen by reaction of a gas comprising methane with steam and/or an oxidant gas comprising oxygen;

producing higher molecular weight hydrocarbon compounds or oxygenates in a syngas conversion process;

removing offgas comprising unreacted hydrogen and unreacted carbon monoxide from said syngas conversion process; and

separating unreacted hydrogen from said offgas or from a gas derived therefrom to produce separated hydrogen product, wherein unreacted hydrogen is separated in a cryogenic separation process to produce separated hydrogen product that is substantially free of unreacted carbon monoxide and a first cryogenic liquid comprising unreacted carbon monoxide, characterized in that the process further comprises:

separating unreacted carbon monoxide from said first cryogenic liquid or from a cryogenic liquid derived therefrom in a cryogenic distillation column to produce separated carbon monoxide product and substantially carbon monoxide-free cryogenic liquid.

2. (Original) A process as claimed in Claim 1 wherein the cryogenic separation process is a liquid methane wash.

3. (Currently Amended) A process as claimed in Claim 1 ~~or Claim 2~~, wherein higher molecular weight hydrocarbon compounds are produced, said process further comprising using separated hydrogen product for hydrogenation of a fraction of said higher molecular weight hydrocarbon compounds to produce liquid hydrocarbon compounds.

4. (Original) A process as claimed in Claim 3 wherein said separated hydrogen product is used in the hydrogenation of said hydrocarbon fraction without purification.

5. (Currently Amended) A process as claimed in ~~any of Claims~~ Claim 1 to 4, further comprising recycling separated carbon monoxide product for conversion into higher molecular weight hydrocarbon compounds or oxygenates.

6. (Currently Amended) A process as claimed in ~~any of Claims~~ Claim 1 to 5, wherein said first cryogenic liquid further comprises argon, said process further comprising removing at least one argon-enriched stream from a location in the region of high argon concentration in the cryogenic distillation column.

7. (Currently Amended) A process as claimed in ~~any of Claims~~ Claim 1 to 6, wherein the substantially carbon monoxide-free cryogen liquid is substantially pure liquid methane, said process further comprising recycling a vaporised portion of said substantially pure liquid methane for conversion into syngas.

8. (Currently Amended) A process as claimed in ~~any of Claims~~ Claim 1 to 7, wherein said offgas further comprises helium, said process further comprising separating helium from said separated hydrogen product using a membrane separation system.

9. (Currently Amended) A process as claimed in ~~any of Claims~~ Claim 1 to 8, wherein said offgas further comprises low molecular weight hydrocarbon compounds, said process further comprising:

cooling said offgas or a gas derived therefrom to condense said low molecular weight hydrocarbon compounds to produce liquefied petroleum gas ("LPG") and removing said LPG to produce substantially LPG-free offgas;

cooling and at least partially condensing said substantially LPG-free offgas to produce partially condensed substantially LPG-free offgas; and

separating unreacted hydrogen from a vapour portion of said partially condensed substantially LPG-free offgas in said cryogenic separation process to produce said separated hydrogen product and said first cryogenic liquid.

10. (Original) A process as claimed in Claim 9 wherein unreacted hydrogen is present in said first cryogenic liquid, said process further comprising separating unreacted hydrogen from said first cryogenic liquid or a cryogenic liquid derived therefrom in a further cryogenic separation process to produce separated hydrogen fuel by-product and a second cryogenic liquid comprising unreacted carbon monoxide.

11. (Original) A process as claimed in Claim 10 wherein the further cryogenic separation process is a liquid methane wash.

12. (Currently Amended) A process as claimed in Claim 10 ~~or Claim 11~~, wherein said offgas further comprises helium and wherein separated hydrogen product is recycled for conversion into higher molecular weight hydrocarbon compounds, said process further comprising removing a portion of said separated hydrogen product once the concentration of the helium in the separated hydrogen product is between from 1 mol % to 20 mol %.

13. (Original) A process as claimed in Claim 12 wherein said portion is adjusted in flowrate so that the helium concentration reaches the required concentration.

14. (Currently Amended) A process as claimed in ~~any of Claims~~ Claim 1 to 13, further comprising at least partially vaporising liquid nitrogen ("LIN") to provide refrigeration duty to keep the process in heat balance.

15. (Currently Amended) A process as claimed in ~~any of Claims~~ Claim 1 to 14,

wherein the oxidant gas is oxygen with a purity below 99 mol % produced in an integrated cryogenic air separation process, said LIN being produced in said air separation process.

16. (Currently Amended) A process as claimed in ~~any of Claims~~ Claim 1 to 15, wherein said separated hydrogen product is recycled for conversion into higher molecular weight hydrocarbon compounds.

17. (Currently Amended) A process as claimed in ~~any of Claims~~ Claim 1 to 16, wherein said syngas is generated by partially oxidizing natural gas with oxygen and by refining natural gas with steam.

18. (Currently Amended) A process as claimed in ~~any of Claims~~ Claim 1 to 17, wherein said syngas conversion process is a Fisher-Tropsch ("FT") process.

19. (Currently Amended) ~~An Apparatus~~ apparatus for the production of higher molecular weight hydrocarbon compounds or oxygenates from a gas comprising methane according to the process as defined by ~~Claim 1~~, said apparatus comprising:

a syngas generation system for generating syngas comprising carbon monoxide and hydrogen by reaction of a gas comprising methane with steam and/or an oxidant gas comprising oxygen;

a syngas conversion system for converting syngas into higher molecular weight hydrocarbon compounds or oxygenates and producing offgas comprising unreacted hydrogen and unreacted carbon monoxide; and

a cryogen separation system for separating unreacted hydrogen from said offgas or a gas derived therefrom to produce separated hydrogen product that is substantially free of unreacted carbon monoxide and a first cryogenic liquid comprising unreacted carbon monoxide, characterised in that the apparatus further comprises:

a cryogenic distillation column for separating unreacted carbon monoxide from said first cryogenic liquid or from a cryogenic liquid derived therefrom to produce separated carbon

monoxide product and substantially carbon monoxide-free cryogenic liquid.

20. (Currently Amended) An apparatus as claimed in Claim 19, wherein the cryogenic separation system is a first liquid methane wash column.

21. (Currently Amended) An Apparatus as claimed in Claim 19 ~~or Claim 20~~, producing higher molecular weight hydrocarbon compounds, said apparatus further comprising a hydrogenation system for hydrogenating a fraction of said higher molecular weight hydrocarbon compounds using separated hydrogen product to produce liquid hydrocarbon compounds.

22. (Currently Amended) An Apparatus as claimed in ~~any of Claims~~ Claim 19 to 21, further comprising conduit means for feeding separated carbon monoxide product from said cryogenic distillation column to said syngas conversion system.

23. (Currently Amended) An Apparatus as claimed in ~~any of Claims~~ Claim 19 to 22, further comprising conduit means for removing an argon-enriched stream from a location in the region of high argon concentration in said cryogenic distillation column.

24. (Currently Amended) An Apparatus as claimed in ~~any of Claims~~ Claim 19 to 23, wherein said substantially carbon monoxide-free cryogenic liquid is substantially pure liquid methane, said apparatus further comprising conduit means for feeding substantially pure liquid methane from said cryogenic distillation column to said syngas generation system.

25. (Currently Amended) An Apparatus as claimed in ~~any of Claims~~ Claim 19 to 24, wherein the offgas further comprises helium, said apparatus further comprising a membrane separation system for removing helium from separated hydrogen product.

26. (Currently Amended) An Apparatus as claimed in ~~any of Claims~~ Claim 19 to 25, wherein unreacted hydrogen is present in said first cryogenic liquid, said apparatus further

comprising a second liquid methane wash column in which unreacted hydrogen is separated from said first cryogenic liquid or a cryogenic liquid derived therefrom to produce separated hydrogen fuel by-product and a second cryogenic liquid comprising unreacted carbon monoxide.

27. (Currently Amended) An Apparatus as claimed in Claim 26, wherein said offgas further comprises helium and wherein separated hydrogen product is recycled for conversion into higher molecular weight hydrocarbon compounds or oxygenates, said apparatus further comprising conduit means for removing a portion of said separated hydrogen product having a concentration of helium between from 1 mol % to 20 ~~mo~~ mol%.

28. (Currently Amended) An Apparatus as claimed in ~~any of Claims Claim 19 to 27,~~ wherein the syngas generation system comprises a partial oxidation ("POX") reactor and an enhanced heat transfer reformer ("EHTR").

29. (Currently Amended) An Apparatus as claimed in ~~any one of Claims Claim 19 to 28,~~ wherein the syngas conversion system comprises at least one FT reactor.
